DCM200EX

DIGITAL CONFERENCE SYSTEM

Features

The **LUCASACS New Generation Network Digital Conference System** features a streamlined architecture combining a central control unit, an integrated processor, and high-performance microphone units. Utilizing **Cat5e (or higher)** for core connectivity and **Cat6 Ethernet** cables for microphone expansion, the system ensures effortless installation and scalability. Our advanced digital signal processing (DSP) enhances stability, security, and anti-interference, delivering the high-fidelity warmth of analog audio with the reliability of modern long-distance power-over-cable technology.

Technical Specifications

Feature	Specification
Network Connectivity	1-channel network port for synchronous audio and control signal transmission with the main unit.
Microphone Capacity	4 groups of RJ45 interfaces; each outlet supports up to 15 microphone units.
Power Consumption	210W
Power Supply	AC 220V - 240V, 50Hz–60Hz
Dimensions	253 x 223 x 60 mm (W x H x D)

71 - 75 Shelton Street Covent Garden WC2H 9JQ LONDON U.K.
