DSM RST

REPEATER UNIT

Features

The standard interpreter cable length from the transmitter to the first interpreter console is 11 meters. If the cable length exceeds 11 meters, the system must use a repeater unit to boost the signal. Each repeater unit supports an additional 11 meters of cable length.

Technical Specifications

Feature	Specification
Consumption Rating:	1.5 W
Support Cable Length:	11 meters
Dimensions:	120 × 40 × 50 mm
N.W:	213 g
